

JunheeChoi,

Actuarial Analyst | Reinsurance & Risk Support

Actuarial analyst specializing in insurance data validation and cashflow reconciliation, with hands-on experience supporting reserve-related analysis.

Experienced in reviewing policy-level data, recalculating key figures, and ensuring consistency between reported results and contractual assumptions.

Interested in supporting reinsurance administration, treaty-based analysis, and experience monitoring within a global reinsurance environment.

WORK EXPERIENCE

Summit Actuarial Consulting, Seoul, Korea Actuarial Intern

SEP 2025 – FEB 2026

- Reviewed large-scale insurance contract data to validate calculation logic against actuarial assumptions.
- Performed data consistency checks and reconciliations in Excel to support reserve validation and ensure alignment between source data and reported outputs.
- Analyzed key actuarial assumptions and summarized their impact on insurance liabilities for internal review and client reporting.
- Identified data inconsistencies requiring clarification and escalated them to support accurate reserve-related results.
- Collaborated with senior actuaries and project team members to support insurance valuation and risk assessment tasks.

KB Insurance Project (Client Engagement) Actuarial Project Contributor

NOV 2025 - DEC 2025

- Reviewed policy-level data and validated key calculation components for a non-life insurance portfolio, ensuring consistency between raw data, recalculated results, and actuarial outputs for internal review.

MG Community Credit Cooperatives Project Actuarial Project Contributor

DEC 2025 - JAN 2026

- Participated in actuarial support tasks for cooperative insurance products by reviewing contribution and benefit-related data.
- Performed data validation and reconciliation checks to ensure consistency between underlying data, recalculated results, and actuarial outputs used for reserve-related reporting.
